Clinician Notes

Patient reports feeling tired most afternoons for the last two months and has been sleeping about six hours a night. No chest pain or shortness of breath.

Plan discussed at this visit: start Vitamin D3 supplementation as prescribed for 8 weeks, reduce fried food and sugary drinks, and walk 30 minutes daily. Patient prefers lifestyle changes before considering any cholesterol medication.

Follow-up: repeat lipid profile, HbA1c and Vitamin D in 6 months (around September 2026).
